Bank 2.0-Brett King 2010 The financial crisis is just beginning for retail institutions. Ninety to ninety-five per cent of bank transactions are executed electronically today. The Internet, ATMs, call centres and smartphones have become mainstream for customers. But banks still classify these as alternative channels and maintain an organisation structure where Branch dominates thinking. Continued technology innovations, Web 2.0, social networking, app phones and mobility are also stretching traditional banking models to the limit. BANK 2.0 reveals why customer behaviour is so rapidly changing, how branches will evolve, why cheques are disappearing, and why your mobile phone will replace your wallet all within the next 10 years.

Asia's Banking CEOs-Peter Hoflich 2008-09-15 Peter Hoflich has written a book which gives a truly informative perspective of banking in Asia. Not only has he profi led a wide range of CEOs of varying background, nationality and ambition, but he has also given valuable insights into the banking infrastructure itself in many countries. Whether it is the astonishing growth story of HDFC under Aditya Puri, the bureaucrat turned banker focus of Guo Shuqing of CCB, the regulatory pressures under which Syed Ali Raza works at National Bank of Pakistan, the new frontier potential of internet-only banks such as Matsuo Taiichi's eBank and Ishii Shigeru's Sony Bank and more—there is something here for every observer of Asian banking. -Andrew Long Group General Manager & Head of Global Transaction Banking, HSBC If you want to get a good insight into the strategies and thinking that drive bankers in Asia, this is the book for you. It is not very often that you get a chance to know the personal philosophies of bank executives, but also something about their backgrounds and histories. This book gives great insights into where some of the most important banks in Asia are headed and what challenges they face. The scope is very broad, featuring banks and bank executives in Japan, China, Korea, India, Pakistan, Thailand and Sri Lanka. Not only are the largest banks covered but also the smaller ones, and one of the more interesting sections is about the executives that run the internet banks. A fascinating and well-written book. -Mark Mobius President, Templeton Emerging Markets This is an always interesting and often intriguing look behind the scenes at some of the Asian financial institutions that are helping to shape our future and the bankers who run them. Peter Hoflich has a provocatively edgy style that makes for a quick read. -Craig Weeks Managing Director, Global Trade Services, JPMorgan Whether you lived through the Asian financial crisis, are new to the region, or are a veteran global banker, this book is enlightening. Peter Hoflich captures the essence of some of the great leaders in Asian banking, their institutions and environments. He reveals how they formed or transformed institutions at lightning speed during the past decade resulting in some of the largest global banks and some of the most nimble. The personalities shine through with descriptions such as "a salty northerner" and "the grizzled demeanor of a chain smoker." Most have passion and vision plus strong disciplines to liberate hidden potential both for their countries and for the global banking industry. An inspiring read. -Karen Fawcett Group Head of Transaction Banking, Standard Chartered Bank One of the best business books I have read in many years. It accurately describes our recent history in banking, especially in the fast-moving consumer banking world. It is also a book about strategy, management and innovation. But, more difficult, it is a unique gallery of portraits of leaders who made Asian fi nancial services what it is today, with managers who taught us many lessons and whose clarity of analysis, efficiency in action and contributions to the industry and society will continue to influence all of us and help us build the future of banking in our region. This book is a must. Reading it, you will discover banking in Asia. Studying it, you will understand its development. Reflecting on it, you will be able to learn even more about yourself, about your opportunities, and your own way to demonstrate your leadership. -Philippe Paillart Managing Partner, Sin Rong Investment and Advisory Group

Science for Survival-Peter Cotgreave 2003 In the modern world, science and technology touch our lives every day, and if they are to serve the public interest it is more important than ever that society discusses the way in which scientific research is performed, funded, organized and reported. Science for Survival provides an accessible and readable examination of the ways in which society interacts with science and the means by which political and other leaders use and misuse science and engineering. Case studies, such as the handling of 'mad cow disease' and the internet revolution, reveal both how mistakes are often made in handling science and technology, and also how good practice can contribute to the public interest. Each of the first eight chapters of Science for Survival is focused on an issue of public debate - such as the environment, unemployment, defence, pensions, or transport policy - and uses recent examples and historical parallels to demonstrate different aspects of the relationship between science and the rest of society. The final chapter examines some of the ways in which society can discuss science, technology and engineering in order to maximise mutual understanding between scientists and non-scientists. Science for Survival is written for anyone who cares about the public interest in twenty-first century society, and about how science and technology can be used to serve the public good.

Banking-Graham Flower 2012 Over the past 30 years, banks have increasingly lost their relevance to the customer. Thinking that primarily focused on their internal needs, and not their customers', led to them to neglect emerging customer trends and created a space for new competitors to challenge their position. Consumers learnt many valuable lessons during the financial crisis at the end of the first decade of the 21st century, which coincided with the phenomenal rise of social media and consumer-orientated technology, such as smartphone and tablet apps. Uncertainty educated them about the need to gain control over their money and social media taught them the value of their personal data. Banks can no longer assume that they can use consumers' personal data without their approval. If regulators don't force banks to become more transparent, consumers certainly will. Banks continue to torture customers with push marketing techniques based on models with declining response rates, whilst ignoring the customers trying to buy across disconnected channels. Meanwhile, new lean non-bank competitors stalk banks, offering consumers compelling experiences by leveraging the new technology, a superior understanding of consumers' needs (as they are not hindered by legacy product or channel-based thinking) and better use of data.However, all is not lost for traditional banks that have lost relevance to their customers. Banking: In search of relevance outlines a new model to help regain relevance in the customer's eyes and discuss how banks might survive the impact of the consumer and technology shockwave. The book will appeal to any executive running a multi-channel financial services business, either B2C or B2B.

The Evaluation of opportunities of electronic commerce to retailing companies in the UK and Hong Kong-Thorsten Rohn 2000-11-02 Inhaltsangabe:Abstract: The thesis Evaluation of opportunities of Electronic Commerce to retailing companies in the UK and Hong Kong is written with particular emphasis on Internet banking. The primary objective of the research was to evaluate opportunities e-commerce provides to the retail banking industry in the UK and Hong Kong. The thesis looks at already established Banks who extend their distribution channels by offering Internet banking as well as pure Internet banks. Chapter one provides a brief overlook of the approach and methodology to the thesis. Chapter two contains a general overview about the Internet and e-commerce. Chapter three deals with Internet banking and how the Internet affect the distribution of financial services. Chapter four analyses the macro environment for retail banking in the UK and Hong Kong. Chapter five then tries to identify opportunities for Internet banking but also possible threats and weaknesses. Chapter six makes the attempt to find determinants of successful Internet banking. The final chapter provides a brief summary of the thesis and an outlook of the future of Internet banking. At the end of the research, the authors expected four gains. First, improve the skills, from research to data collecting, language, analytical and problems solving, etc. Secondly, the study in dept about e-commerce and the banking industry of Hong Kong and the UK will drive the authors to the international approaches and experiences. Thirdly, the methodology and writing expression will enhance author communication skills. Finally, the author hopes that companies can benefit from the findings of this thesis.
